

DIRECTIONS FOR USE

FIRST

Shake the refill bottle for 30 seconds before pouring into the applicator to the "fill line"

SHAKE...

PUMP...

Pump until the "domed" lid offers resistance. Pump during use to maintain pressure.

SPRAY...

For best results, spray a very fine mist over the area to be cleaned from about 20cm. Do not soak the vehicle.

WAIT...

5 to 10 seconds while NO-WET softens, emulsifies and lifts the dirt to prevent scratching.

WIPE...

Wipe off the dirt in a single direction with a clean 'Terry' towel or cotton cloth.

BUFF...

Buff the vehicle to a brilliant showroom finish with a second clean 'Terry' towel or cotton cloth.

When using the product on glass remember *less is best!*

OR CLEAN UP!**

No Silicones. No Abrasives,
Contains UV Protectants
plus Carnauba Wax
& Kaolin Clay

ENVIRONMENTALLY FRIENDLY

Wash a car without water? ..."It'll scratch it"

NO-WET is a premium quality product specially formulated to produce the very best 'showroom finish' without scratching or smearing. At last you can thoroughly valet your car - both inside and out - with a single product!

How does it work?

Within seconds of applying **NO-WET** it softens, emulsifies and encapsulates the dirt particles, providing a protective barrier between the dirt and the paintwork. It is now safe to wipe clean without the risk of scratching. It cannot and will not scratch!

After buffing, the vehicle is now sealed against the elements, and protected against harmful UV rays that fade paintwork.

NO-WET is entirely environmentally friendly. It contains 17 of the finest ingredients including Canauba Wax and Kaolin Clay, all of which are from natural plant or vegetable origin .

NO-WET is a highly effective cleaner which easily removes dirt, mud, grime, road film, tar, grease, oil, bugs, flies, bird droppings, sap, stains and so on without water, harmful chemicals, or the risk of scratching. Suitable for use on all non-porous surfaces.

Use it for brilliant results on cars, trucks, boats, caravans, light aircraft, motorbikes, bicycles, jetskis, windows, stainless steel, kitchen appliances and more.

THE ADVANTAGES OF NO-WET

- :: fast , easy and simple to use
- :: no water, hoses, buckets, sponges, soaps or brushes needed
- :: wash, wax, polish and sealant all in one
- :: provides UV protection against paint fading
- :: dispels mist, condensation and steam from visors, glass and windows
- :: no silicones, adhesives, abrasives or harmful chemicals
- :: environmentally friendly
- :: non-static
